About Me

- Technical Support Analyst with hands-on Tier 1-2 experience supporting Windows endpoints, Microsoft 365, user accounts, email, VPN, Wi-Fi, and business connectivity. Holds diplomas in Computer Systems Technician and Network Administration, with project-based experience in Ubuntu/VPS administration, Active Directory, DNS/DHCP, REST APIs, Python automation, and Azure/AWS fundamentals. Brings 8+ years of customer-facing experience, clear ticket documentation, and systematic troubleshooting skills.

Experience

Outlier AI
AI Data Specialist - Technical Quality Review
Jan 2025 - Present
Remote

- Evaluate AI-generated technical content for accuracy, reliability, clarity, and instruction compliance; document reproducible errors and recommendations.
- Research unfamiliar systems, compare evidence, identify root causes, and deliver structured QA feedback independently under deadlines.

Nordia / Bell Support Program
IT Support Technician
Sep 2021 - Jan 2023
Toronto, ON

- Delivered Tier 1-2 support for Windows endpoints, Microsoft 365, Active Directory accounts and access, email, hardware, software, VPN, Wi-Fi, and business connectivity.
- Diagnosed DNS, DHCP, router/modem, latency, and endpoint issues through structured triage; resolved or escalated cases with complete technical notes.
- Installed and configured hardware and software, maintained accurate tickets, and explained technical steps clearly to non-technical users.

iMarketing Solutions
Client Solutions Advisor - Technical Sales
Jan 2018 - Jul 2021
Toronto, ON

- Identified customer technical needs, budgets, and service requirements, then recommended suitable solution packages.
- Maintained CRM histories, pipeline notes, and follow-ups; coordinated with service and sales teams and explained product features and limitations clearly.

Canadian Tire Bank
Financial Solutions Sales Specialist
Jan 2015 - Dec 2017
Toronto, ON

- Supported digital banking, product, account, and payment inquiries; processed applications accurately under privacy and compliance procedures.
- Built trust through active listening, clear explanations, and reliable follow-up in a high-volume service environment.

Infrastructure & Automation Projects

Linux VPS Support
Ubuntu, SSH, systemd, DNS, firewall

Administered services, ports, logs, uptime, remote access, and basic hardening.

Network Administration
Windows Server, AD, DNS/DHCP, Azure/AWS

Configured users, groups, permissions, endpoints, and documented support procedures.

Automation Tools
Python, PowerShell, Bash, FastAPI, SQLite

Built health checks, validation, logs, diagnostic reports, and repeatable workflows.

Local AI & GPU Platform
Ollama, ComfyUI, FFmpeg/NVENC

Integrated Windows/Linux services and troubleshoot endpoints, ports, paths, dependencies, and logs.

Education

Computer Systems Technician
Seneca Polytechnic
Diploma | 2023 - 2025

Network Administration
CIMT College
Diploma | 2022 - 2023

Technical Skills
